

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started out on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road expedition.

Whilst on their trip, John spent time talking to previous business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered an infinite marketplace for a product that could quickly and securely elevate people in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John established a joint venture with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The business incorporates many of the simple design elements of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into several global marketplaces and continues to develop modern machines to guarantee that consumers are able to become safer and more well-organized within their workplace.
